

Special Issue

Industry 4.0 Impacts on Lean Production Systems: Sustainable Practices

Message from the Guest Editors

The pervasiveness of innovative digital technologies is profoundly transforming the way industrial systems are being operated. New production and logistics paradigms as well as more conscious and sustainable approaches to operating industrial systems are becoming standard for companies. In line with these premises, the aim of this Special Issue is to solicit contributions investigating the interconnection of Lean Manufacturing methodologies, Industry 4.0 technologies and impacts on the Triple Bottom Line (TBL) of sustainability. Contributions may include mathematical models, theoretical approaches and frameworks, as well as successful implementations of the new digital technologies, and their integration with lean practices for sustainable development. Scientific works showing the enabling as well as empowering effects of Lean Manufacturing methodologies or Industry 4.0 concepts and technologies on economic, ecological and social sustainability aspects of Supply Chain Management and Manufacturing Management are highly appreciated.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
