

Special Issue

Innovating Learning Analytics for Sustainable Higher Education

Message from the Guest Editors

Learning analytics has offered much promise for learning and teaching in recent years, and it has gained a key place in debates around learning and teaching improvement. Indeed, it has become a field of study on its own, with its own conferences and journal. However, similar to the introduction of other technologies in education, the delivery on its promise has been slow, as educational institutions have not adopted learning analytics in a comprehensive manner, in a way that followed the initial expectations. The focus of this Special Issue is the sustainable deployment and implementation of learning analytics so as to improve and add value to learning and teaching in higher education, with a particular focus on learning design and pedagogy.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
