Special Issue

Legislation and Post Disaster Reconstruction

Message from the Guest Editor

This Special Issue will focus on the constraints and opportunities around disaster-related legislation and regulatory requirements for sustainable reconstruction programmes after disasters. Literature suggests that legislation and regulatory requirements can significantly influence the rate of recovery from natural disasters. The expectation is that these facilitate reconstruction and are enabling of recovery, while also future-proofing against disaster events. However, very often, legislation and regulatory requirements are not appropriate and are inimical to post-disaster reconstruction objectives for increased resilience and reduction in vulnerabilities. This Special Issue provides a platform for an increased understanding of the considerations that should be given to the peculiarities of post-disaster reconstruction programmes within legislation. It is intended to feature a collection of papers on lessons learnt from the review and/or revision of disaster-related legislation in different jurisdictions so that they serve as best practices for future more sustainable reconstruction programmes in the aftermath of natural disasters.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
