

Special Issue

The Dawn of mHealth Innovation

Message from the Guest Editor

A health management service, mobile health, is becoming a reality in the context of mobile technology. However, it raises privacy concerns, and makes the analysis a black box. In order to solve these technical and social problems, this Special Issue will include but is not limited to:

- Conceptual propositions on technology and innovation for sustainability and social implementation of mHealth and Healthcare AI;
- Systematic reviews on technology and innovation for sustainability and social implementation of mHealth and Healthcare AI;
- Methodology for the analysis, design, and implementation of innovative technology, products/services, and systems for sustainability and social implementation of mHealth and Healthcare AI;
- Practices and case studies on technology and innovation management for sustainability and social implementation of mHealth and Healthcare AI.

We expect that this Special Issue will serve as a forum for anyone with an interest in and passion toward the realization of a sustainable society through technology and innovation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
