

Special Issue

Innovation and Strategic Management for the Development of Tourist Destinations

Message from the Guest Editors

Innovation and a strategic management approach are the key aspects for a sustainable development of a tourist destination, due to the fact that they guarantee, on the one hand, the optimal integration of tourism into the economy, environment, and culture of that location—through the capacity to coagulate synergies—and on the other hand, they allow an adequate satisfaction of tourists' demands and expectations. The purpose of this Special Issue is to present and discuss the importance of innovation and strategic management to ensure the sustainable development of tourist destinations, so to improve their offers in relation to visitors' expectations as well as their competitiveness in tourism, while preserving the environment. We invite scholars interested in the sustainable development of tourist destinations to critically reflect on issues concerning the intersections between tourist destination, innovation, strategic management, development, and sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
