

## Special Issue

# Sustainable Management and Multiple Attribute Decision Making

### Message from the Guest Editors

The 2030 Agenda for Sustainable Development, proposed by the United Nations in 2015, set 17 goals that challenge nations to act in a global partnership towards a better future. The aim of this Special Issue is to bring together recent challenges and scientific developments addressing decision making within the context of the Sustainable Development Goals (SDG). The topics of interest include the following fields:

- Data-driven application;
- Closed-loop supply chain modeling;
- Sustainable supply chain management;
- Tertiary logistics;
- Reverse logistics;
- Multiple criteria decision making in sustainability;
- Reference-point-based models;
- Group decision-making models;
- Sustainability indicators, including life cycle analysis.

---

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
