

## Special Issue

# Sustainable Management and Utilization of Waste Materials in Construction

### Message from the Guest Editors

Today, there are many opportunities for useful reduction and recovery of materials that would otherwise be destined for disposal or landfill.

From a legislative point of view, governments and institutions can take responsibility for the efficient disposal of waste, as well as promoting public and industry awareness of disposal issues and subsequently ensuring a stable business environment for waste collection, treatment, and reuse. The industry can create opportunities for manufacturing companies by returning waste back to manufacturing processes through the application of reverse logistics to the enterprises. This Special Issue is focused on solving problems around:

- Waste after/from the manufacturing process;
- 3R objectives (reduce–recover–recycle);
- Applications of new materials into the industry;
- Reverse logistics;
- Circular economy principles.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
