Special Issue

Managing Sustainability in Times of Uncertainty

Message from the Guest Editors

The world has observed several natural disasters (Earthquakes, Tsunami, Floods, Draughts, etc.) and manmade hazards (Gas Leaks, Chemical Explosions, Oil Spill, etc.) in recent years that have had a significant impact on the lives and economies of the affected regions. Currently, the whole world is going through a very turbulent phase due to the ongoing COVID-19 pandemic. This pandemic has brought the world economy to a standstill that has never been seen before. Financial markets across the globe are struggling, many economies have suffered severe damages, are ongoing and perhaps would take years to return to the growth trajectory. However, this uncertainty has managed to halt the utilization of natural resources and mitigate climate-related risks. All these facts compel us to think about how the ongoing uncertainty would affect sustainability initiatives around the globe during uncertain situations during pandemics and other severe uncertainties.

Inspired by the current opportunity, this special issue seeks to invite submissions that focus on understanding the impact of uncertainties such as pandemics and natural/man-made hazards on sustainability across all sectors.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
