

Special Issue

Sustainable Manufacturing Management

Message from the Guest Editors

Technological innovations and the changing global context based on dynamic processes are opportunities in sustainable manufacturing. Sustainable manufacturing is considered as “the set of technical and organizational solutions contributing to the development and implementation of innovative methods, practices, and technologies, in the manufacturing field, for addressing the worldwide resources shortages, for mitigating the excess of environmental load and for enabling an environmentally benign life cycle of products”. This Special Issue aims to collect recent innovative research, theoretical and practical insights for the stakeholders on sustainable manufacturing management. Scientific contributions, ranging from basic research to applied research with pilot industrial applications and demos, are welcome. This Special Issue expects contributions from academic and industrial researchers on opportunities for the improvement, replacement, reuse, and reduction of the impacts of products, processes, and systems in the management of sustainable manufacturing.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
