Special Issue

Marine Benthic Ecology and Climate Change

Message from the Guest Editors

At present, climate change is one of the main threats to benthic ecosystems and, thus, to their functioning and provided services. Many studies have shown the effects of global warming on benthic organisms. However, most of these studies are focused on a few geographical regions and taxa. Our knowledge of the effects of other stressors related to climate change, such as ocean acidification, heat waves, and other extreme climate events, is still limited. Moreover, the need to explore the interactive effects of different stressors related to climate change is growing, because these stressors and other anthropogenic disturbances may take place simultaneously, resulting in additive, synergic or antagonistic effects on the organisms. Moreover, changes on seawater temperature, pH or wave regimen can also modify the result of many biological interactions, such as competition or predation. Observational studies on distribution range shifts, local extinctions, changes on phenology or long-term data series are welcome, particularly if they consider poorly studied geographical regions and/or taxa.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
