

Special Issue

Sustainable Management of Marine Debris

Message from the Guest Editors

Marine debris is a relatively new field of study that is gaining traction. However, literature on sustainable approaches to manage and mitigate marine debris risk is scarce. This Special Issue intends to further our understanding of sustainable ways to prevent and reduce the impacts of marine debris. Themes that could be covered include marine debris prevention, removal, distribution, impacts, risk mitigation, trajectory prediction and track, life cycle assessment, education, citizen or community science, and interactions with humans and/or wildlife from local to global scales. In addition to research articles, case-studies and program assessments are encouraged for this issue. We hope you will consider submitting an article. If you have any questions about the potential fit of your article or have any other questions, please reach out to us. Additionally, please feel free to send this invitation to any colleagues that might be interested in submitting a manuscript for consideration in this Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
