

## Special Issue

# Life below Water: Marine Biology and Sustainable Ocean

### Message from the Guest Editors

The aim of this Special Issue is to collect papers regarding the biodiversity conservation and protection of marine ecosystems, paying special attention to innovative tools for monitoring both natural and anthropic disturbances, mitigation measures, and restoration of marine habitats.

The present Issue will be devoted to studies focused on the conservation of marine biodiversity, including relevant papers dealing with population genetics and systematics, forensic studies, environmental crimes and sustainable exploitation of marine biological resources, innovative tools for species detection and monitoring, and the occurrence and impacts of invasive alien species.

It also will include papers related to different environmental contaminants, their levels in water and sediments, as well as their bioaccumulation and effects on marine species.

Moreover, this Special Issue will also welcome papers dealing with mitigation and restoration measures for marine habitats and their ecosystem services.

Finally, this Issue will also consider papers regarding new innovative tools for data collection, elaboration, and modeling.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
