Special Issue

Materiality in Sustainability Reporting

Message from the Guest Editor

Sustainability has become a central societal consideration, thereby affecting industry and organizational competitiveness, and leading to investors increasing demand for information on firms' exposure and management of environmental, social and governance (ESG) issues. As a result, firms face increasing pressure to measure their externalities and disclose information about whether their operations are economically, socially, and environmentally sustainable. Financial materiality became one of the most important shifts in sustainability reporting. Financial materiality is assumed to improve the informativeness of ESG reporting as it directs firms, investors and other stakeholders' attention to ESG risks and opportunities that are critical to their business. From a practical perspective, financial materiality can bridge the gap between financial statements and ESG reporting. These aspects reinforce the relevance of better understanding the drivers and the effects of integrating financial materiality in ESG assessment and reporting, which is the objective of this Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
