Mechanics of Sustainable Polymeric Materials

Message from the Guest Editor

Sustainable polymers from renewable natural resources are environmentally friendly replacements for petroleum-derived polymers. In the 21st century, there has been a rapidly growing research interest in inventing sustainable polymeric materials to combat the detrimental effects of the traditional petroleum-derived polymers on the natural environment since the middle of the 20th century. As the foundation of the proper function of sustainable polymeric materials, mechanical properties are critical to making sustainable polymeric materials comparable to their high-performance petroleum-derived counterparts. The mechanical properties also play a role in both the pre-use processing and the post-use recycling of sustainable polymers, as controlling the energy dissipation in a mechanical process is highly relevant to the reduction of “carbon footprint”.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
