

Special Issue

Economic Growth, Energy Consumption and Sustainable Development: The Case of Mediterranean Region

Message from the Guest Editors

This Special Issue has the aim to collect a selection of homogenous papers on the relationship between economic growth, energy consumption and sustainable development, with a special focus on the Mediterranean region. Research papers address the construction of indicators of sustainability, such as sustainable development goals (SDGs) related indicators, energy, ecological footprint, sustainable welfare and quality of life; moreover, two important issues covered by the papers are governance and management control issues in social and environmental perspectives; the role of organizations and universities to promote sustainable innovations will also be included. Finally, the Special Issue addresses papers from the PRIMA project, the Partnership for Research and Innovation in the Mediterranean Area, which will devise new R&I (research and investments) approaches to improve water availability and sustainable agriculture production in a region heavily distressed by climate change, urbanization and population growth.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
