

Special Issue

Exploring the Microecological Risks of Environmental Biological Pollution and Sustainability in Environmental Restoration

Message from the Guest Editors

We propose the compilation of a Special Issue “Microecological Risks of Environmental Biological Pollution and Sustainability in Environmental Restoration”. Original work and critical reviews regarding the following areas are welcome:

- Source tracking of biopollutants in artificial environments;
- Modelling of the transport of biopollutants in the environment;
- Health risk analysis to establish the relationship between environmental characteristics and biopollutant health risks;
- Detection methods to determine emerging biopollutants (e.g., COVID-19) in the environment;
- Clean-up techniques to minimize biopollution in the environment;
- Environmental management strategies to control the spread of biopollutants in the environment.

We believe that articles that focus on advancements in these topics will be exciting to a broad readership and help to increase the visibility of *Sustainability*. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
