Emerging Transportation in Sustainable Development Environment: Multi-Modal Transportation and Connected Automated Vehicle (CAV) Technology

Message from the Guest Editors

With the support of information technology, the transportation system is developing towards safety, intelligence, and sustainability at an extremely fast speed. It not only brings much more travel choices, but also brings an increasingly complex traffic environment. The transportation system is currently in the development stage of multi-modal transportation. The objective of this SI is to discuss the new problems and methods of green mobility, sustainable transportation, emerging transportation, multi-modal transportation, and CAV technology. Original research articles and review papers are welcome. Research areas may include the following:

- Green transportation and low carbon mobility system;
- Solutions of emerging technologies for traffic safety;
- Energy and emission solutions for transportation systems;
- Policies and strategies for sustainable development of transportation;
- System architecture, modeling, and simulation of multi-modal transportation;
- Modeling and analysis of connected automate driving behavior;
- Perception, control and decision technology of CAV;
- Collaborative management of CAV in complex traffic environment.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
