Special Issue

Recent Advances, Applications and Challenges for Nanocomposites in Water and Wastewater Treatment

Message from the Guest Editor

One of the foremost environmental problems existing around the world is water pollution. Considering the role of water and its significance in human and environmental health, decrease in its quality by pollution, and incomplete success in the removal of contaminants from water and wastewater by common treatment methods to meet the standard limits, the introduction of new attitudes and methods seems to be very necessary. Furthermore, clean water scarcity, combined with the environmental impacts of municipal and industrial wastewater, requires developing new technologies for clean water production and removing impurities and toxic contaminants from water and wastewater. Researchers working on the synthesis and application of novel nanocomposites to treat water and wastewater containing pollutants are cordially invited to submit original research papers or reviews to this Special Issue of Sustainability. Case studies describing real-life applications of novel technologies are also very welcome...

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
