Special Issue

Nature Conservation in Sustainability

Message from the Guest Editors

This Special Issue intends to deepen the knowledge of in situ and ex situ nature conservation and its implications for sustainability. It is devoted to a wide spectrum of organisms from microorganisms and fungi to higher plants and animals, as well as to varied levels of biological organizations from individuals and populations through ecosystems and landscapes to biomes and biosphere. Contributors from different fields are invited to submit their articles on topics including (but not limited to):

- biodiversity conservation on any spatial scale (local, regional, or global) and temporal scale;
- current and projected concequences of anthropogenic transformations of habitats and ecosystems;
- innovations and good practices in nature conservation;
- management of protected areas;
- ecological restoration.
