

Special Issue

New Directions in Co-Producing Research to Action for Sustainability

Message from the Guest Editor

Co-producing research with communities and practitioners is widely recognized as a critical practice in sustainability to link knowledge to societal action.

However, despite decades of calls for co-produced research, broader impacts, and actionable science, these efforts are often limited by institutional (dis)incentives and science funding models as well as an underappreciation for issues related to governance, politics and power. For this Special Issue, we invite papers that explore the possibilities and potentials for the next generation of co-production that links knowledge to action for sustainability. We welcome empirical work that analyzes under-conceptualized aspects of co-production (including social processes, politics, governance, and power).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
