

## Special Issue

# New Frontiers in Design and Planning for Healthy Built Environments

### Message from the Guest Editors

Operationalization of the healthy built environment is a complex process underpinned by a need to master past lessons, critically consider responses to current crisis, and envision coming trends and risks, all for the purpose of coping with future challenges successfully. Thus, the aim of this Special Issue is to formulate relevant research questions and provide adequate responses that reveal the characteristics of the built environment in circumstances characterized by the presence of massively infectious human diseases. Authors are encouraged to propose and apply novel multi-, inter-, and transdisciplinary approaches in exploring various scales and elements of the built environment, from different types of buildings and closed spaces to segments of urban form and functions, i.e., (green) open spaces, urban density, transport, mobility, etc., to social environments and practices (e.g., social distancing) embedded into these layers of the built environment. The editors welcome manuscripts prepared either as comprehensive reviews or original research articles.

### Guest Editors

Prof. Dr. Alenka Fikfak

Dr. Saja Kosanović

Dr. Matej Nikšić

Dr. Christine Mady

### Deadline for manuscript submissions

closed (30 December 2021)

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
