# Sustainability and Circularity: New Material Scenarios for Product Design

Message from the Guest Editors

The concept of sustainability is a continually evolving threshold in step with technology and the ability it provides for understanding the environment. Various disciplines have always contributed by bringing essential concepts and tools to approach the growing complexity of the design project and its continuous dialogue with the environment.

This Special Issue aims to bring together research on the development of materials and processes that can foster the development of innovative products that can promote a circular economy. It includes research on rethought and updated traditional materials; interactive, connected and smart materials; self-produced materials using alternative resources such as waste and scrap; upcycling processes, living biological materials or those that have lived, capable of self-generating and growing.

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

### **Author Benefits**

# Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
