

Special Issue

Occupational Health and Safety Interventions for a Sustainable Working Environment

Message from the Guest Editors

This Special Issue focuses on how interventions based on organizational development and occupational health can contribute to create decent work and improve the quality of life at work. This is particularly relevant under the current context, in which the COVID-19 pandemic and the ongoing threat of an economic crisis and global recession may result in job losses and an impoverishment of working conditions. On the other hand, the recovery from the COVID-19 outbreak may entail the opportunity to develop a different economy, tracking a more sustainable, inclusive, and healthy path. We welcome original research papers, brief reports, and reviews from different disciplines (e.g., psychology, sociology, economics, management, engineering, public health, etc.) or an interdisciplinary focus on factors and measures to develop organizations and societies that (a) provide stable employment and self-employment with decent working conditions; (b) promote more inclusive working environments; (c) offer meaningful and more participative jobs within a social responsible strategy of the organization; (d) improve personal competences and social growth.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
