

Special Issue

Preserving Community Interests in Ocean Governance towards Sustainability

Message from the Guest Editors

This Special Issue is designed to focus on the community interests in ocean governance towards sustainability, and how to preserve these interests through the effective implementation of the international law of the sea and of the SDGs. The scope of the Special Issue will have several edge-cutting coverages: first, it will examine relevant legal issues concerning ocean governance in the context of SDGs for long-lasting benefits of the international community; second, it will identify new legal obligations to safeguard navigation and maritime security by considering the marine environment; third, it will evaluate effective legal frameworks for the sustainable use of marine resources (living and non-living); and fourth, it will discuss the regulations for marine scientific research and new developments of marine technologies for marine environmental protection. The purpose of the Special Issue is to highlight the concept of community interests in sustainable ocean governance, which will be fully reflected in a series of anticipated papers.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
