

## Special Issue

# Sustainable Operations Planning and Scheduling

### Message from the Guest Editors

We invite you to submit papers to this Special Issue. We are looking for research contributions on topics such as:

- Sustainable supply chain planning and scheduling
- Inventory control management for sustainability
- Sustainable operations planning and scheduling opportunity identification techniques
- Risk and opportunity management approaches for sustainable operations
- Energy and water consumption reduction approaches
- Vendor and contractor management for sustainability
- Waste/emissions minimization in scheduling
- Case studies and lessons learned

It is important to implement the most advanced solutions in operations to further reductions in our already efficient operations. The research methods of sustainable operations planning and scheduling are developing in a diversified direction. We are open to any contributions adding to the understanding of how to improve sustainability in operations planning and scheduling. It could be new theory, tools, methods, new approaches, etc. We also welcome case studies that can support research questions and bring lessons learned together with new insight on the above-described topics.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
