

## Special Issue

# Organisation Management for Environmental Sustainability

### Message from the Guest Editors

The purpose of the Special Issue will be to bring together scholars interested in the broadly understood pro-environmental approach to organisational management. We encourage an interdisciplinary perspective on an organisation and its milieu, combining an individual and organisational approach, bearing in mind that only comprehensive and multi-level strategies can result in environmental benefits. The list of topics below is by no means exhaustive; they are merely suggestions for scientific investigation. This special issue welcomes contributions presenting both conceptual frameworks, systematic literature reviews and empirical results in the following areas:

- green CSR
- green HRM
- constructing relations with business environment (including customers) on the basis of pro-ecological principles and guidelines
- pro-environmental education of customers
- green performance
- eco-innovations, extending the life-cycle of products
- leadership
- pro-environmental behaviours of employees
- ecological trends in consumer behaviours

---

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
