# Learning, Resilience, and Employability in Organisational Sustainability

## Message from the Guest Editors

Sustainability is announcing a Special Issue that is dedicated to the topic of learning, resilience, and employability in organisational sustainability. This Special Issue will provide an outlet for cutting-edge research that addresses the processes through which organisations tackle sustainability issues, and the role of employees in these processes. We especially welcome submissions that explore constructive and destructive conflict cases, learning and development issues, the integral management of sustainability at different levels of analysis, and other topics that explore the learning and resilience processes that are relevant for sustainability in organisations. We invite both quantitative and qualitative studies, and especially seek research that uses multi-source data, incorporates multiple methods, uses multi-level analyses, and is longitudinal. # **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
