Exploring and Analyzing Links between the COVID-19 Pandemic and Globalization—Levers for Sustainability Transitions?

Message from the Guest Editors

Humanity currently faces COVID-19, a large global pandemic comparable to the 1918–1920 influenza, which according to some sources was a main underlying factor ending the First World War. This is an example of a pandemic with indirect long-term outcomes affecting global historical development.

In parallel, the ongoing pandemic may contribute to the transition to a sustainable society developing within planetary boundaries. Essentially, a large global transition is required.

The Special Issue intends to provide original articles, smaller reviews containing important contributions, together with historical examples of possible links between the pandemic and sustainability transitions from a multidisciplinary perspective, thus providing critical perspectives and selected evidence pro et contra the suggested linkages between pandemic(s) and sustainability. The Special Issue aims to bring together a set of papers that can give readers an overview of the important interfaces in the socio-technical-ecological system connecting short-term large events with long-term structural changes.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
