Special Issue

People and the City: Real Estate-Scape as a Sustainable Citizenship Project

Message from the Guest Editors

Dear colleagues, The previous SI, entitled "Real Estate Landscape: Accounting, Appraisal and Assessment" was an opportunity to broaden knowledge and consolidate awareness of the relationship between multiple concrete urban values and their abstract monetary measures, with specific reference to the value of the real estate capital asset. This Special Issue aims to stimulate further reflection on the "real estate-scape" in the climate of the current "age of changes." concerning new and different relationships between state and market, accumulated and redistributed wealth. public and private sphere. This prospect concerns the constructive role of the value judgment in the reform of the home-city-landscape system in view of the civil and moral progress of the urban communities coping with environmental threats that are increasingly less predictable as well as more and more insidious.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
