Special Issue

The Impact of Plant Genome Editing

Message from the Guest Editors

This special issue addresses the actual and potential impact of genome editing technologies in terms of socio-economic, environmental and health impacts that result directly and indirectly from the use of genome editing technologies in plant research and breeding. It also addresses the actual and potential impact on plant research and plant breeding in terms of utility of this technology and novel opportunities for discoveries, elucidation of pathways, and global cellular knowledge, and as a facilitator for crop trait management. The special issue will include a range of perspectives including technical, scientific, economic, environmental, social, ethical, and others. Interdisciplinary articles are welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
