

Special Issue

Place Attachment in the Age of Globalization, Digitalization and Virtual Reality

Message from the Guest Editor

This Special Issue provides a forum to discuss and identify the implications of digitalization, globalization, tourism and virtual reality on the psychological construct of place attachment. Special attention should be given to the implication of these developments in mobility and technology on the links between place attachment and pro-environmental behaviours, aiming to identify the barriers, challenges and opportunities for sustainability.

Keywords:

- Place Attachment
- Pro-environmental behavior
- Globalization
- ICT
- Place relationships
- Topophilia
- Sense of place

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
