

Special Issue

Sustainable Planning and Management of Urban Water Systems

Message from the Guest Editors

Sustainability in the field of hydraulic engineering, especially in the field of sustainable urban water systems, is an important and unexplored topic, and reaching the circularity of those systems is a challenge nowadays. This would assure the equilibrium between modernity in the engineering aspect and safety in the environmental aspect. To achieve, there must be a necessary and major advance in different fields, such as new developments based on smart technologies (digitalization), new materials, innovative and integrated methodologies, analytical approaches to assure the guarantee of domestic water supply, innovative hydrological/hydraulic analytical processes, landscaping and architectural developments, urban planning and management, as well as pioneering engineering designs, among others. Manuscripts that cover these fields and related topics are welcomed for this Special Issue (SI) entitled “Sustainable Planning and Management of Urban Water Systems”.

Guest Editors

Prof. Dr. José-Luis Molina

Dr. Fernando Espejo

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
