

Special Issue

Planning Resilient Community: Public Participation and Governance

Message from the Guest Editors

This Special Issue 'Planning Resilient Community: Public Participation and Governance' will uncover the theory and practice of planning for urban resilience. In this regard, we focus on innovation and investigation regarding community engagement and institutional approaches to deal with socio-ecological systems. The community and individuals are the centre of discussion in resilience-oriented planning, and several studies have recommended innovation and integration through social learning process (Schauppenlehner-Kloyber and Penker, 2016). We are interested to know how the community can engage in reducing vulnerability using local knowledge and self-organisation capacities. The role of institutional reforms for planning resilient communities is also critical in unpacking an adaptive management approach.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
