## Plastic Waste and Pollution

### Message from the Guest Editors

Plastic waste is becoming extremely threatening to the environment due to the high quantities generated, which pose serious harm to both the environment and its inhabitants. A major victim of this menace is the marine environment. Plastic wastes generated on land find their way to water bodies, where they cause detrimental effects such as flooding and poisoning of the animals in the marine ecosystem. The plastics in the marine environment, which are ingested by fish, are also deleterious to human health if such fish are consumed. Notable attempts such as source reduction, reuse, and landfilling have been employed to reduce the critical amount of plastic waste generated annually. However, owing to rapid developments, there has been a persistent increase in the amount of plastic waste generated. Therefore, finding effective alternative ways to recycle this plastic waste will go a long way towards ensuring a sustainable environment.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
