

Special Issue

Environmental Pollution, Climate Change and Human Health: Determinants, Impacts and Responses for a Paradigmatic Change

Message from the Guest Editors

This Special Issue aims to strengthen the knowledge of the impacts of environmental pollution on human health, highlighting response strategies and working towards healthier environments for all. The body of scientific evidence is increasingly showing new interlinkages between environmental pollution and human health, going beyond the traditional non-communicable diseases. With a vision of societal paradigmatic change, new and emerging scientific evidence, understandings of health determinants, public health interventions, environmental health education campaigns and advocacy actions, citizen science and capacity-building efforts in the health sector are the main foci of this Special Issue. Topics include:

- Environmental pollution, health outcomes and policies;
- Societal and development models as environmental health determinants;
- Climate change and health;
- Climate policies for health;
- Greening the health sector (including the health sector's environmental footprint);
- Environmental health education;
- COVID-19 and environmental health;
- Citizen science;
- "One health", sustainable development and the path toward a society for health.

Guest Editors

Prof. Eduardo Missoni

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
