

Special Issue

New Post-pandemic Digital Educational Scenarios

Message from the Guest Editors

This Special Issue publication aims to collect the most relevant research describing the benefits recognized upon the implementation of innovative experiences, as well as the weaknesses of this technologies. Especially interesting is that since research highlighting successes tends to predominate, cases describing failures are more limited, even though it is an aspect of great interest to those in charge of developing and implementing the curriculum of educational institutions. The articles should incorporate a scope related to the keywords from a multidisciplinary perspective to be useful for people from different areas wishing to implement these advances, and to guide their future activities in this innovative direction. We believe that it is necessary to assemble the most pioneering research from a rigorous and scientific perspective, and we encourage researchers to send their works to this journal. Deadline for abstract submissions: 16 July 2022.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
