

## Special Issue

# Recent Advances in Poultry Management

### Message from the Guest Editors

Poultry production has proven to be probably the most successful sector of animal production. With a wide variety of products, increased productivity and a series of alternative production systems, poultry production has shown admirable skills of adjustability to the concerns and attitudes of the modern consumer. Nevertheless, there is still work to be done in terms of research and development, especially towards the modern challenges of climate change, welfare issues and overall sustainability of production. This Special Issue will focus on the recent advances in the production of broilers and laying hens, as well as other types of birds (i.e., turkeys, ducks etc.), mainly around the following subjects: a) Structural characterization and clustering of the production systems, b) Housing and management practices, c) Application of innovative and IT methods, d) Trends in nutrition, e) Technical and economic efficiency of farms, and f) Quality of poultry meat and eggs...

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
