

## Special Issue

# Multidimensional Child Poverty and Sustainability

### Message from the Guest Editors

Investing in children and reducing child poverty is a prerequisite for sustainable economic and social development. Sustainable Development Goal 1 (SDG1, Target 2) states: “By 2030, reduce at least by half the proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions”. Such a Target refers to a multidimensional perspective and can be understood as focusing on non-monetary aspects of poverty. This Special Issue, aligned with SDG1, Target 2, aims to present a selection of papers on the complex phenomenon of child poverty of all stages of childhood, taking into account that child poverty has to be studied from a multidimensional perspective so that different vulnerabilities of children can be recognised and the causes that keep children trapped in poverty can be better understood in order to plan effective policies for reducing child poverty in a long-term and sustainable manner.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
