

Special Issue

Precision Agricultural Technologies for Sustainable Controlled Environment Agriculture

Message from the Guest Editors

Enhancing the EU's resilience to climate change and food security requires investment in a low-carbon economy that promotes energy efficiency and the uptake of green products. The recent proliferation of technical innovations in agriculture and emergence of the Agri-Tech Industry demonstrates how socio-economic benefits to EU citizens can be derived from tackling food production problems linked with greenhouse gas emissions, over consumption of energy and water. Controlled Environment Agriculture (CEA) is "an integrated science- and engineering-based approach to provide specific environments for plant and animals productivity while optimizing resources including water, energy, space, capital and labour. We invite you to contribute to this issue along these topics, comprehensive reviews and specific case studies that focus on methods, models, techniques and analyses applied to controlled environment agricultural systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
