

## Special Issue

# Sustainable Supply Chain Management for Process Industry

### Message from the Guest Editors

The aim of this Special Issue, “Sustainable Supply Chain Management for the Process Industry”, is to address critical aspects in strategically developing, designing, planning, controlling, and managing a supply chain (SC) for the process industry under sustainable conditions.

Particular objectives are to highlight contemporary issues in developing a sustainable SC and to propose new approaches for managing the inevitable uncertainty inherent in SC operations. Additional issues to be explored within this context include efficient and effective solutions to address conflicting performance objectives emanating from the variety of operations and their objectives in a SC with particular emphasis on sustainability considerations.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
