

Special Issue

Sustainable Supply Chain Management for Process Industry

Message from the Guest Editors

The aim of this Special Issue, “Sustainable Supply Chain Management for the Process Industry”, is to address critical aspects in strategically developing, designing, planning, controlling, and managing a supply chain (SC) for the process industry under sustainable conditions.

Particular objectives are to highlight contemporary issues in developing a sustainable SC and to propose new approaches for managing the inevitable uncertainty inherent in SC operations. Additional issues to be explored within this context include efficient and effective solutions to address conflicting performance objectives emanating from the variety of operations and their objectives in a SC with particular emphasis on sustainability considerations.

Guest Editors

Dr. Vasiliki Kazantzi

Prof. Dr. Hon Loong Lam

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
