

Special Issue

Advances in Sustainable Product Design under Industry 4.0: New Methods, Strategies, Perspectives and Practices

Message from the Guest Editors

Accompanied by industrial and technological advancement, product design has also evolved to a systemic paradigm shift towards “human concerns” and “environmental considerations” (Design 3.0). Industry 4.0 describes the trend towards digitalization, network utilization, intellectualization, and decentralization of the production environment, enabling industries to enhance a product’s entire value chain over its lifecycle. As such, how to advance product design under the initiative of Industry 4.0 to achieve more economic, social, and environmental sustainability is a critical issue for both academia and industry. This Special Issue aims to address recent advances in sustainable product design under the auspices of Industry 4.0. We encourage researchers and practitioners to present original articles relevant to sustainable product design in the context of Industry 4.0, including new methods, strategies, perspectives, and practices. Review papers presenting the state-of-the-art of a research area and pointing out new further research directions are also welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
