Special Issue

Product-Service Systems: A Sustainable Design Strategy

Message from the Guest Editors

Product–service systems (PSS) are oriented toward the design and development of function and circularity, for example, solutions that prolong and extend the use stages of products such as sharing, renting, and pooling. Generally, PSS solutions strive to reduce the commoditization of things by turning them into services, and thus, fewer products and more services are foreseen to contribute to a sustainable future. The purpose of this Special Issue is to present studies, empirical or conceptual, that inspire the PSS field of research and education. In this Special Issue, original research articles may address (but not limited to):

- Efforts in engineering training and practice, for example, commissioned education or student/industry collaborative projects:
- Innovative strategies for collaboration in early concept development;
- Agile and innovative methodologies for sustainable PSS;
- 'Seeing-or doing-first' methods (modeling, simulation, prototyping) that drive novel thinking and the progress of a PSS paradigm in engineering;
- Digital service innovation for sustainable PSS;
- Interesting and reflective research related to the problematization of the above topics.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
