

## Special Issue

# Project Management for Sustainability Practices

### Message from the Guest Editors

This Special Issue aims to investigate the contribution of project management for sustainability practices to social systems, as well as the emerging managerial and organizational implications, in terms of sustainability, which are also unpredictable and nonlinear, which derive from the implementation of project management methodologies, techniques and tools. Moving from multidisciplinary fields of research, this Special Issue aims to attract papers that, by focusing on original theoretical and practical contributions related to the application of project management to sustainability issues, can promote a new way of knowing (epistemology) and learning, and a new observational perspective. This Special Issue offers the opportunity to publish on a state-of-the-art topic, promoting wide diffusion, recognition and citations of the submitted papers. Besides this, many other benefits will be provided, such as support from the editors, feedback and tips to improve a manuscript, peer endorsement of the published works, and a community of contributors with outstanding networking opportunities.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
