Dealing with Projects in a Dynamic Scenario: New Managing Approaches and User-Centered Tools

Message from the Guest Editors

Dear colleagues, At present, uncertainty, complexity, and change are three challenges that sustainable project management must overcome. Furthermore, new technologies and digital transformation involve the execution of new project typologies, which in many cases have a high degree of technological complexity: Internet of Things, systems oriented to user experience, Industry 4.0, Smart Cities, Artificial Intelligence, and Big Data. Thus, a static and unidimensional definition of the scope of projects is not available anymore. Instead, an open and dynamic life-cycle point of view for project management is demanding new approaches for consistent and sustainable project management. That dynamic scenario encourages new approaches for complexity management, megaprojects, and multiproject management. For further reading, please visit the [Special Issue Website](#).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
