Special Issue

Psychological and Behavioral Aspects of Sustainability

Message from the Guest Editor

Achieving environmental, cultural, economic, and social sustainability is predicated on changing human behavior; the purview of Psychologists. For instance, research based in cognitive, social, and behavioral psychology has informed initiatives regarding public education and advocacy, framing of messages, decision making, incentive-based regulation, and social marketing. This special issue of *Sustainability* invites scholars to submit theoretical, empirical, and application oriented manuscripts addressing existing or potential contributions of Psychology to the Sustainability Sciences.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA
