

## Special Issue

# The Psychology of Sustainability: Expanding the Scope

### Message from the Guest Editor

This Special Issue is designed to focus on new issues and populations that are important to advancing sustainability across the globe. We especially hope to emphasize collective action, possibilities for adaptation to changing environmental conditions, and the relevance of mental health to sustainability efforts. This Special Issue invites the submission of new research as well as essays that critically reflect on the field in order to highlight research gaps and identify promising new directions in the psychology of sustainability. Papers that feature non-Western and indigenous groups, highlight the role of culture, and/or emphasize the role of participants across the lifespan and not just young adults are particularly welcome.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
