

## Special Issue

# Public Marketplaces Promoting Resilience and Sustainability

### Message from the Guest Editor

Marketplaces have changed the world. And the purpose of marketplaces is complemented today by many other purposes, such as local food systems and food security, reducing food miles, enhancing public places, and increasing pedestrian access to retail, tourism, etc. This Special Issue offers authors the opportunity to reflect on changes in marketplaces and on how, recently, they are being used to support a variety of public and private purposes, from immigrant households to corporate practices. I encourage researchers and practitioners to submit original research articles, case studies, reviews, critical perspectives, and viewpoint articles on topics including, but not limited to, the following:

- Methodological aspects of urban marketplaces;
- The processes of assessing marketplace contributions to sustainability;
- Stakeholder involvement in urban marketplaces;
- The evolution of marketplaces, their history, and contemporary organization;
- Lessons learned from research and practice of public markets;
- Households and individual dynamics and the social/regulatory construction of marketplaces.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
