

Special Issue

Assessing the Relative Importance of Sustainability Indicators for Public Open Spaces and Existing Urban Neighbourhoods

Message from the Guest Editors

Special Issue "Assessing the Relative Importance of Sustainability Indicators for Public Open Spaces and Existing Urban Neighbourhoods" aims to provide a platform to share the latest research findings on the study of public open spaces and existing neighbourhoods in urban areas. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- environmental, economic, and social benefits of public open spaces and urban neighbourhoods
- key aspects and indices to evaluate quality of public open spaces and urban neighbourhoods
- planning and design of open spaces in urban redevelopment process and existing neighbourhoods
- sustainable model for the planning of public open spaces and existing neighbourhoods in cities
- planning and design practice/methodology on public open spaces and urban neighbourhoods
- public open spaces/existing neighbourhoods and healthy, age-friendly, and inclusive cities

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
