

Special Issue

Sustainable Public-Private Partnerships for Future-Proof Efficient Assets

Message from the Guest Editors

Public-Private Partnerships (PPPs) have been adopted worldwide as a procurement model able to leverage private capital and private expertise, to deliver and manage public infrastructure and public services. The debate and literature on PPP have grown significantly in the last decade. This Special Issue intends to bring sustainability to the center of debate on PPPs, providing a set of papers that can pave the way towards a more holistic evaluation, development, and implementation of PPPs. The following areas are most welcome (not exclusive):

- Sustainability assessment in PPPs;
- Monitoring sustainability in PPP projects;
- Financial sustainability of PPPs;
- PPPs for environmental projects;
- PPPs and resilient projects.

Dr. Joaquim Miranda Sarment

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
